

Enhanced Care Management

PERSONALIZED CARE BEYOND THE OFFICE

Patients with chronic or complex needs often require added support between visits to stay on track with their care. The **Enhanced Care Management program from Honest Health** works alongside your practice to reinforce the care you provide, serving as an added layer of support between appointments. Through nurse-led management, regular phone check-ins, and virtual visits, our team identifies needs early, reviews medications and care plans, and connects patients with helpful resources. This consistent and coordinated engagement keeps high-risk and rising-risk patients supported, helps them stay on track with treatment plans, and reduces unnecessary hospital and emergency visits.

Benefits for Your Patients

Personalized support: Nurse-led support tailored to their health needs and goals.

Early Intervention: Ongoing outreach reduces preventable hospital admissions.

Continuity of care: Collaborative assessments ensure seamless alignment with your practice.

Empowerment: Education and coaching help patients manage their conditions.

Benefits for Your Practice

Extend your care team: We provide regular check-ins and education as an extension of your practice.

Enhance outcomes: Better patient engagement improves adherence and drives quality performance.

Support financial health: Preventing unnecessary utilization protects resources and strengthens sustainability.

Connecting Patients to Support

Our team may reach out to eligible patients by phone, text, or email to begin services. We encourage you to introduce this program to your patients and reassure them it is delivered in partnership with your care.

Honest  Health

HONEST HEALTH IS PROUD TO PARTNER WITH YOU IN SUPPORTING YOUR PATIENTS' HEALTH.
